

INFINITY  
**GAMES**

ONE STOP SHOP GAMING BLOCKCHAIN  
ECOSYSTEM FOR GAMERS AND DEVELOPERS

# OK, so what's wrong?

## Centralization of the gaming assets and gaming markets

- ◆ Gamers are not owners of the gaming assets they have in the games. They cannot trade or sell them. Developers can take assets from them at any time!
- ◆ Users cannot securely resell games they own.

**Blockchain games can be immersed with the same gaming assets across the games. Data on the blockchain is transparent and everyone can use it in new games. But the looks are not the same and players cannot connect with the new games!**

# Wait, we have a solution!

## Decentralized Gaming Ecosystem Where:

- ◆ Gamers will own assets that can be traded, borrowed, or sold
- ◆ Users can securely sell games in the form of the NFTs on specialized marketplace
- ◆ Gamers can organize them in guilds fully operable by smart contracts
- ◆ **Gamers can EARN by playing games**

# There is More!

## Decentralized And Immersed Metaverse Where:

- ◆ Any studio which joins the Infinity Games ecosystem will get all graphic models of all assets in our ecosystem. It is a win-win situation for gamers and developers. Gamers can use their assets (characters or items) in new games. Developers will get a user base and faster development time.
- ◆ Infinity Games metaverse will be an ever-growing metaverse with which users can connect and identify.

# Our Web Platform

s:\\www.infinitygames.tech

## What are we building?

- ◆ Infinity Games will be a fully decentralized ecosystem run by people with specialized nodes.
- ◆ On the web platform, users will be able to find and play games, track their progress and assets, trade or borrow them on the marketplace and join and organize guilds.
- ◆ On the web platform, game developers will have full logistical support. They will have access to all graphical and physical models of all assets in the Infinity Games ecosystem.

The First Game  
In Our Metaverse

Most advanced blockchain based auto battler

Develop and own NFTs characters and items

## How are we planning to earn?

### We take:

- ◆ 2% commission for our service from the NFTs marketplace.
- ◆ 10% commission for service of selling games that are not free to play (commission and developers' percentages for future reselling can be adjusted)
- ◆ 3% commission for enabling independent studios to sell their digital assets
- ◆ 2% commission from borrowing digital assets
- ◆ Direct sales of digital assets from the in-house games. The first game is Infinity Heroes

# Tokenomics

		%	Token Amount
<b>Ecosystem</b>	Locked by the smart contract (verified and all public addresses). Emission for Infinity Founding and PtoE rewards to be decided by DAO. Emission for Infinity Heroes (First Game) and Infinity Nodes to be decided by team, and later DAO.	50	5.000,000,000
<b>Early investors</b>	Vesting dynamics will be transparent to community.	15	1.500,000,000
<b>Treasury</b>	Marketing, development, CEXs. Transparent to the community.	25	2.500,000,000
<b>Launchpad</b>		5	500,000,000
<b>Core Team</b>		5	500,000,000
<b>Total supply</b>			10.000,000,000

# How will we acquire users and retail?

20% of the private sale and early investment funding will be used for connection with:

- prominent YouTube influencers in crypto gaming niche (Alex Becker, Crypto Banter, Paul Barron...)
- prominent influencers on Crypto Twitter
- targeting campaigns on r/cryptocurrency and narrow selection of crypto/blockchain websites

2.5% of the INFY total token supply (250,000,000) is secured for the play to earn rewards for our first game Infinity Heroes. It will be used as user acquisition to reward early adopters

8% of the total token supply will be used for the marketing purposes

Regular airdrops for digital assets (NFTs) from the games to gain a player base and build a community

## Roadmap

# How many investments are we looking for?

In the first investment round we are targeting 1.5M USD.

We are opened for equity and private token sale investments.

We are owners of the grant from the Serbian government in cooperation with the EU for our one-of-a-kind NFT marketplace.  
The same technology will be used in the Infinity Games ecosystem.
